Application/Control Number: 10/693,422

Art Unit: 3617

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made:

Page 2

2. Claims 12, 13 and 15-18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Applicant's Prior Art Figure 1B in view of Scheelen et al and Gibson. Applicant's Prior Art Figure 1B discloses the basic claimed structure including a downcomer for use in conveying a substance from an upper level of a marine vessel to a lower level of the marine vessel with a pair of spaced apart mounting portions 20 and an elongate impact portion. Not disclosed by Applicant's Prior Art Figure 1B is the downcomer being formed of ultrahigh molecular weight polyethylene. Scheelen et al teach a pipe with a polyethylene or polyolefin inner and outer portions, including a pigment (paragraph 0014), ultraviolet stabilizer (paragraph 0014), is formed by coextrusion (paragraph 0039), and can be joined end to end ((paragraph 0032). It would have been obvious to a person of ordinary skill in the art at the time the invention was made to form the downcomer of Applicant's Prior Art Figure 1B of polyethylene with an ultraviolet stabilizer, a pigment, formed by co-extrusion, and joining end to end as taught by Scheelen et al for improved strength and crack resistance. Gibson teaches a pipe of ultrahigh molecular weight polyethylene 83 and mounting holes. It would have been obvious to a person of ordinary skill in the art at the time the invention was made to form the polyethylene downcomer of ultrahigh molecular weight polyethylene as taught by

Gibson for improved strength and light weight and to use mounting holes for improved securement.

- 3. Claims 1-11 are allowed.
- 4. Claim 14 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
- 5. Applicant's arguments filed 12/27/04 have been fully considered but they are not persuasive. Applicant alleges that Gibson does not disclose an impact portion of polyethylene. However, claim 12 does not specify that the impact portion is of polyethylene.

Applicant alleges that Gibson and Scheelen et al are not analogous. However, the downcomer of the Prior Art is a pipe and the devices of Gibson and Scheelen et al includes a pipes. A person of ordinary skill the art at the time the invention was made would look to Gibson and Scheelen et al to form a device which is light weight and of high strength and with crack resistance.

Applicant further alleges that the applied references do not disclose any of the disclosed goals. However, only claimed limitations may be relied upon for patentability. The disclosed goals and not claimed, and thus need not be disclosed by the applied references.

6. THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Art Unit: 3617

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Stephen Avila whose telephone number is 703-308-2578. The examiner can normally be reached on Monday to Thursday from 7 AM to 3 PM (EST).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Samuel J. Morano can be reached on 703-308-0230. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
